

How to crowdsource blockchain and other important crypto-projects

Lykke Streams platform

[Streams.lykke.com](https://streams.lykke.com)

Lykke company

Lykke is building a global marketplace where all asset classes and instruments can be traded.

The Lykke Wallet mobile application for iOS and Android is the key element of the Lykke trading ecosystem. Our wallet app makes it easy for you to trade currencies and cryptocurrencies, with complete support for margin trading. You can buy and sell assets such as bitcoin and ether on the open-source Lykke Exchange, our next-generation trading platform, with immediate settlement and direct ownership, thanks to distributed ledger technology.

Lykke Streams

- Lykke is a crowd-based movement: we outsource a lot.
- We encourage talented programmers to contribute to the development of our platform and take part in Lykke Streams contests. We are not a freelancers' platform!
- Everyone can participate and win a cash prize.

As part of the expansion of Lykke Exchange, we are adding **Byteball, Dash, IOTA, Lisk, Monero, NEO, Qtum, RaiBlocks, Ripple, Stellar, Stratis, Waves, Zcash** to our trading pairs.

New Coins on Lykke Exchange: Crowdsourcing Initiative

We are working on adding the following coins to the Lykke Exchange:

- Ethereum classic, Litecoin. These coins are ready for integration, they are currently in testing.
- Dash, Zcash, Ripple are in development.
- Lisk, IOTA, Stratis, Monero, Byteball, Stellar, NEO, RaiBlocks, Qtum, and Waves - for these blockchains corresponding contests on Lykke Streams are running.
- ERC20 is already integrated, but we are waiting for legal approval to list tokens.

You can create a contest in few simple steps:

1. Pass the KYC procedure for Lykke Wallet
2. Log in to <https://streams.lykke.com>
3. Create a new project: click “+”
4. Give the project a name, URL and a deadline.
5. Fill Project details and Project description fields.
6. Specify the prize you think is fair for the project.
7. Save the project as a draft.
Now it is submitted for an approval by the Lykke team. Done!

You can find a detailed instruction in the Streams blog.

Research competitions

- Market Research on the blockchain impact on the Movie industry
- Market Research on the blockchain impact on the Real Estate industry

In a recent market report, it was stated that Blockchain technology has recently been adopted and adapted for use by the Real Estate/Movie industry. Executives are finding that blockchain-based smart contracts can play a much larger role in their industry. Blockchain technology can potentially transform core Real Estate/Movie operations such as funding, creation, distribution, rights ownership and talent sourcing.

The first 3 contestants will receive a prize money of \$1,500, \$500, \$500

Initial Coin Offering: Independent Consultant

The 1st place prize (\$10,000) will be awarded for the period of work in the project (1-1,5 months).

Lykke is looking for an experienced consultant to help one of its clients, with an established career in venture capital management, realize the vision to issue tokenized fund participations come true.

We expect you to have

- Profound experience in TGE (Token Generating Event) projects. (In your CV, please indicate the projects you have previously worked on).
- Careful attention to detail
- Having experience in both, a mid to large-scale company as well as an early stage/entrepreneurial company is preferable
- Fluency in English is a must; knowledge of any other European language is an advantage.

Thank you for your attention!
