

DECENTRALIZED  
CONTENT DELIVERY NETWORK

There are hundreds of millions connected devices on the globe. On average bandwidth is used for only 10-15%

There are dozens of thousands online video services that need to buy bandwidth for delivering video to hundreds of millions of their users.

Teleport will let you sell your unused bandwidth and earn money while you sleep, at the office, traveling and enjoying life

# MARKET

# EVOLUTION

# EVOLUTION

# CURRENT SOLUTION OF TELEPORT

Teleport is the plug-in to your CDN, which allows delivering video content to your users with the same and better quality as CDN, but much cheaper.

For this, you don't need to invest in infrastructure either now or later.

The more simultaneous content consumers you have, the better result you get.

# ONLINE TV WITH TELEPORT

# VIDEO ON DEMAND WITH TELEPORT

How do I pay to nodes from:

Germany

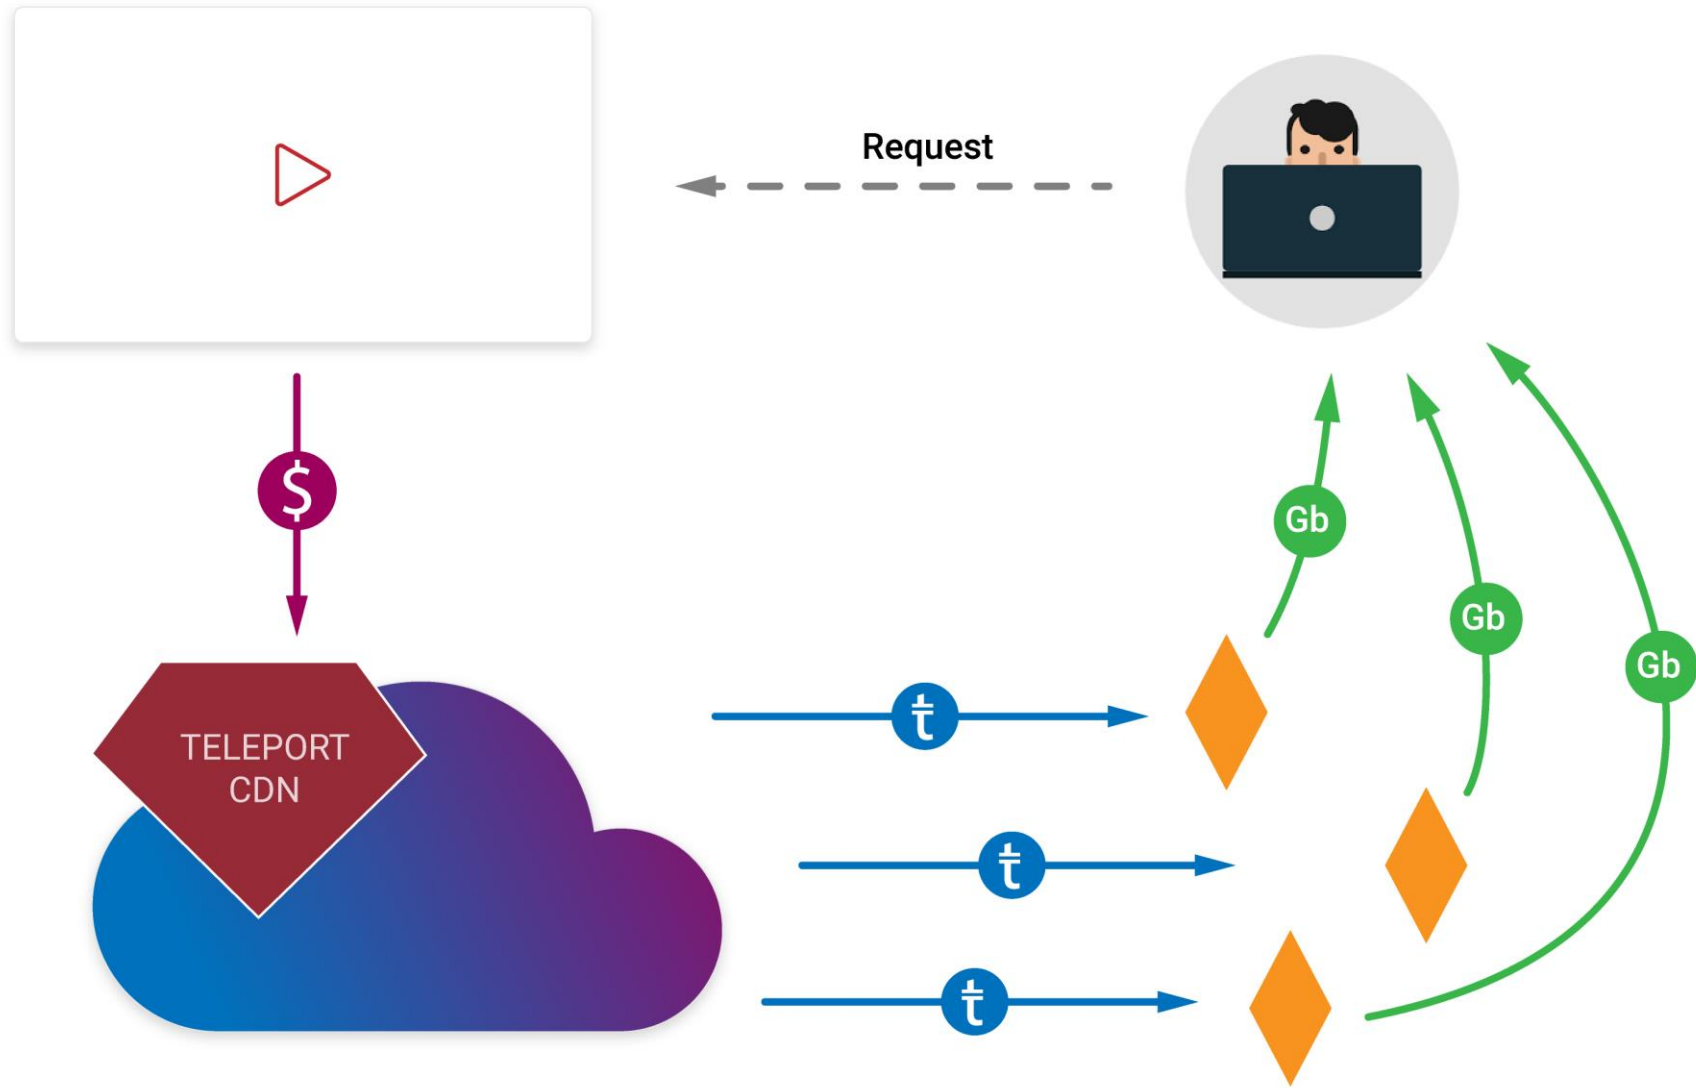

Indonesia

Brazil

...

rest of the world

## MONTH 1

## MONTH 2

Cross-border payments solved  
by single cryptocurrency

Motivation to keep  
cryptocurrency

Anyone could build its own  
CDN and use entire network

Some users are not authorized  
to download

Content is impossible to  
remove from the network

Some nodes may produce  
“junk traffic”

I am the part of decentralized CDN and there is “House of Cards” on my device

Well... I just let anyone download it and who can stop me?

# FORENSIC WATERMARKS

Well... I will just ignore watermarks and  
download from whomever in the network  
  
and who can stop me?

Well... I will just ignore watermarks and  
download from whomever in the network  
  
and who can stop me?

Ok, let's go ~~to the moon~~  
blockchain!

But how?
